Tirunelveli, Tamil Nadu

PROFILE

Full-stack developer with 2+ years of production experience building and scaling e-commerce platforms using React.js, Next.js, and Node.js. Delivered measurable outcomes including a 35% reduction in page load time, 25% faster API response, and 20% improvement in customer satisfaction. Comfortable owning features end-to-end — from UI to API to database — and shipping with confidence.

EXPERIENCE

- Full-Stack Developer** Sep 2023 — Present
BM e-Solutions · Erode, Tamil Nadu · Client: Rocaba Group
- Developed and maintained 10+ e-commerce features (product pages, search, cart, checkout) using React.js, Next.js, and Node.js, improving site functionality and overall user experience.
 - Engineered responsive layouts with thorough cross-browser testing using Chrome DevTools and BrowserStack; raised Lighthouse mobile score by 12 points and boosted customer satisfaction by 20%.
 - Designed and optimised RESTful APIs for product, cart, and order workflows using Express.js — introduced query indexing and response caching strategies, cutting average API response time by 25% and reducing database load.
 - Improved SEO and Core Web Vitals via Next.js Image component, dynamic imports, and code splitting — reduced page load time by 35% and improved search engine visibility.
 - Diagnosed and resolved 20+ production bugs across the React frontend and Node.js API layer using Postman and server logs — reducing customer-reported issues significantly post-deployment.

PROJECTS

- MyBioData** Built with Claude AI · Next.js · TypeScript · Tailwind CSS
github.com/MjjVenish/MyBioData
- Built a personal bio/score tracking web app from concept to deployment using Next.js 14 (App Router) and TypeScript, leveraging Claude AI to accelerate architecture decisions and component scaffolding.
 - Structured the project with a clean separation of concerns — app router pages, reusable components, custom hooks, and a shared lib layer — improving scalability and onboarding readability.
 - Implemented responsive UI with Tailwind CSS and shadcn/ui component system, ensuring consistent design tokens and accessibility across all screen sizes.
 - Used TypeScript throughout to enforce type safety across props and data models, reducing runtime errors and improving developer confidence during refactoring.

- CarrierBag** React.js · Node.js · Express.js · CSS
github.com/MjjVenish/CarrierBag
- Built a full-stack web application with a separate Client (React.js) and Server (Node.js + Express.js) structure — demonstrating clean API-driven architecture and front-to-back ownership.
 - Developed RESTful API endpoints on the server side to handle data operations, consumed from the React frontend using fetch with proper loading and error state handling.
 - Styled the UI with custom CSS for a responsive, mobile-friendly layout — no external UI library dependency, showcasing hand-crafted component design.

- Netflix Clone** React.js · TMDB API · JavaScript
github.com/MjjVenish/Netflix-Clone
- Built a streaming UI using React.js and the TMDB REST API — implemented movie browsing, category filtering, and video previews with real-time data fetching via useEffect and async/await.
 - Architected 15+ reusable components (MovieCard, HeroSlider, CategoryRow) using functional components and custom hooks — reduced code duplication by ~40% and improved maintainability.
 - Designed a fully responsive layout using CSS Flexbox and Grid with zero external UI libraries, ensuring smooth experience across mobile, tablet, and desktop.

SKILLS

FRONTEND

React.js · Next.js · TypeScript
JavaScript ES6+ · HTML5 · CSS3
Tailwind CSS

BACKEND

Node.js · Express.js · REST APIs
JWT Auth

DATABASE

PostgreSQL · MySQL

TOOLS

Git · GitHub · Postman · Vercel
JSON

EDUCATION

B.E. Mechanical Engineering
PET Engineering College
Tirunelveli, Tamil Nadu
2016 – 2020 · CGPA 6.20

CERTIFICATIONS

Frontend Development · Frenzo, Coimbatore

LANGUAGES

Tamil · English

SOFT SKILLS

Problem Solving · Teamwork
Communication · Adaptability
Time Management
